

Atlantic Richfield Company

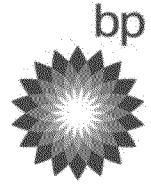

EPA Past Costs discussion Anaconda mine site – Yerington, NV

19 December 2017

EPA Past Costs excluding OU8 orphan share - Anaconda mine site in Yerington

Atlantic Richfield cost contributions to the orphan share

- **\$45m** – Future remediation costs
- **\$10m** – Past costs to comply with EPA Unilateral Orders
- Atlantic Richfield is not seeking a cash contribution from EPA for cleanup of the orphan share.
- AR is seeking relief from the agency from remaining EPA past costs.
- Considering the agency's savings from avoidance of a taxpayer funded cleanup, it would be equitable for EPA to waive remaining past costs as a non-cash contribution to the effort.
